

CUSHIONI Self-adhesive Insulation Wallpaper

Warmer walls. Helps reduce condensation.

Peel-and-stick 8-layer PE foam wallpaper with an aluminum layer, made in our own factory in Korea.

8-layer structure	Aluminum layer	Peel & stick	6 heavy metals not detected (KATRI)

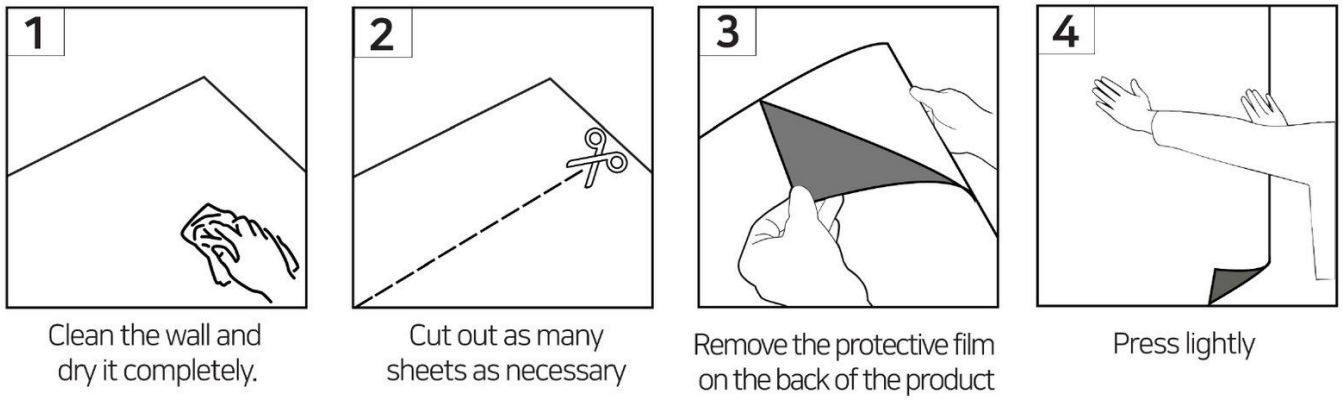

One sheet. Eight engineered layers.

Cold exterior walls make rooms feel chilly and are prone to condensation. CUSHIONI Insulation Wallpaper puts a layer of high-density PE foam and aluminum between the room and the wall, helping keep the room-side surface warmer and drier. It goes straight over existing wallpaper, so the change takes an afternoon, not a renovation.

1	**Transparent film**	protects the surface
2	**Printed layer**	interior finish
3	**PE layer**	bonding and stability
4	**PE foam sheet**	core insulation
5	**PE layer**	bonding and stability
6	**Aluminum film**	reflects heat, shields against damp walls
7	**Adhesive layer**	self-adhesive, no glue needed
8	**Release film**	peel off and stick on

Key features

- **Insulating 8-layer structure.** High-density PE foam with an aluminum-metallized layer helps keep warmth in during winter and heat out in summer.
- **Helps reduce condensation.** The foam and aluminum layers help keep the wall surface warmer and drier.
- **Peel and stick.** Applies straight over existing wallpaper. No paste, no soaking.
- **Silk-texture emboss, matte finish.** A coated surface resists stains and wipes clean with a damp cloth.
- **Soft, cushioned surface.** Absorbs light impacts.
- **Tested materials.** Test reports for 6 heavy metals, phthalates, formaldehyde and thermal retention.

Simple to specify. Simple to install.

Specifications

Item	Insulation Wallpaper	Also available: patterned Foam Wallpaper
Size	100 × 250 cm · 100 × 500 cm	Width 50 / 70 cm · length 2.5 m and longer
