

CUSHIONI 3D Foam Blocks & Foam Wall Panels

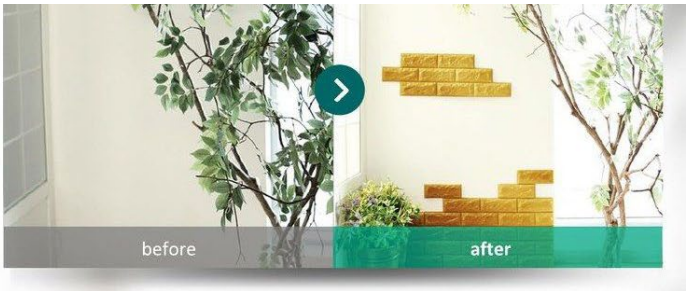

Brick, stone and tile. Up in minutes.

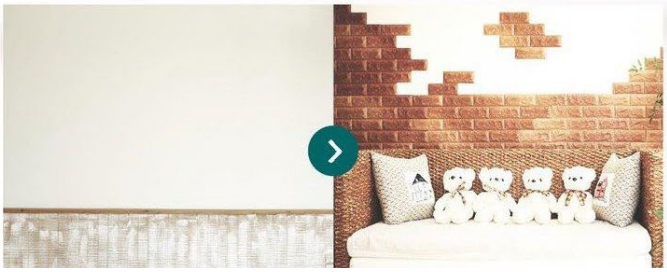

Peel-and-stick PE foam wall panels from our own molds in Korea.

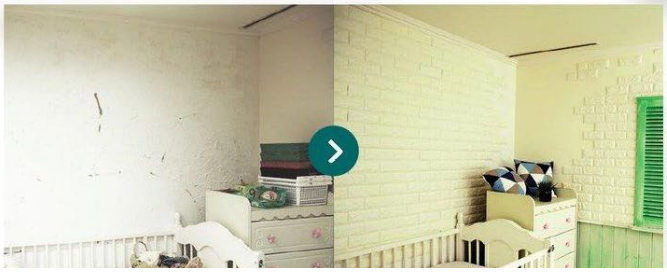

4 models	Various colors	Aluminum-backed	Peel & stick

The look of real masonry, the weight of foam.

CUSHIONI Foam Blocks turn a plain wall into a brick, subway-tile or stacked-stone feature wall without builders, dust or glue. We design and machine the molds ourselves, so the texture is crisp and the finish is consistent from the first panel to the last container.

Key features

- **Realistic 3D textures.** Brick, subway tile and stacked stone with an in-house matte finish, made from molds we design and build ourselves.
- **Peel and stick.** Remove the liner, press onto the wall and wipe. No glue needed; trims with scissors or a utility knife.
- **Aluminum-backed insulation layer.** Helps keep rooms warmer and helps reduce condensation on cold walls.
- **Soft and safe.** Cushioned foam absorbs impact, which suits nurseries and playrooms.
- **Easy to keep clean.** The coated surface resists stains and wipes clean with a damp cloth.
- **Wide range.** Foam Block, Mono Block and Fault Rock in various colors, plus a large-format roll.

Four models. One easy install.

Specifications

Model	Pattern	Size (mm)	Thickness	Colors
Foam Block	Brick	710 × 770	10 mm	Various colors
Mono Block	Subway tile	710 × 770	10 mm	Various colors
