Continuous supply to Daiso Japan

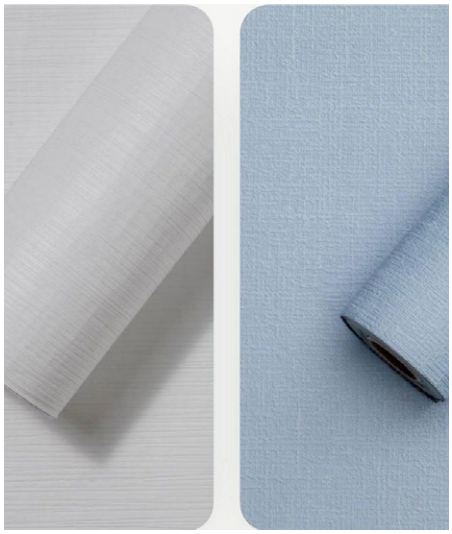

From raw foam to finished product, under one roof.

Every CUSHIONI product starts as PE foam made on our own line in Yeoju. We laminate, print, emboss, mold, cut and pack in the same building, so there are no middlemen between the foam and the finished product. That means consistent quality on large orders, direct control of lead time, and the flexibility to adapt a product to your market.

Six steps, one factory

1. **Product design.** We set material properties, drawings and tolerances to fit your market.
2. **Mold making.** Our own mold division designs and machines dedicated molds.
3. **PE foaming.** Cross-linked PE foam sheet produced on our own line.
4. **Lamination and printing.** Films, prints and foam bonded in-house.
5. **Molding and cutting.** High-precision molding equipment handles a wide product range.
6. **Inspection and shipping.** Strict quality inspection, then shipment by the container.
