SOURCING

HugMe Vitamin Shower Filter

A two-stage shower filter combining a vitamin-C fragrance filter with a sediment filter for cleaner, gentler water.

The HugMe Vitamin Shower Filter pairs two filter stages in one unit. The vitamin filter uses high-concentration vitamin C to help reduce residual chlorine, and is scented by professional perfumers with natural-origin fragrance oils, along with trehalose, milk powder and snail mucin for a moisturizing shower experience. The sediment filter is evaluated to FDA safety standards and uses a micro-filtration system, of the type used in water purifiers, to catch rust particles, sediment and fine debris. It attaches to standard shower heads in place of the existing filter.

Key features

• Two-stage filter: vitamin fragrance filter + sediment filter

• High-concentration vitamin C helps reduce residual chlorine

• Fragrance crafted by professional perfumers

• Sediment filter evaluated to FDA safety standards

• Simple filter-swap installation on existing shower heads

• Recommended replacement every 1–2 months

Specifications

Configuration	Vitamin filter + sediment filter
